

Product Data

I-LC
Locking Cover

I-PS
Plexi Shield

I-WS
Weather Station

Product Description

There are options available when your application calls for additional security or protection.

The I-LC can be used to protect room mounted enclosures from physical damage or tampering. It comes with a clear vented cover and two keys.

The I-PS is a clear lucite shield that is designed to cover a wall thermostat or temperature sensor. Not only will it protect the thermostat or sensor, but it can also be used to stabilize the temperate in rooms where large fans or extreme environment changes are present.

The I-WS is designed to provide protection in both indoor and outdoor environments. It will provide protection from rain, sleet, snow, or against dripping water. It is made of 16 gauge G-90 galvanized steel and is coated with white enamel.
